

TAMBOERSKLOOF CID BUSINESS PLAN

City Improvement Districts (“CIDs”)

For the period 1 July 2025 to 30 June 2030

Compatibility with the City’s IDP and section 22(4) of the MPRA

In the preparation of this business plan, the TBKCID Steering Committee has focused on ensuring the services and projects proposed are consistent with the objectives of the City of Cape Town’s Integrated Development Plan. In addition, that its establishment, structure and activities comply with section 22 of the MPRA, specifically 22(4).

This business plan is available at <https://www.tbkcid.co.za>

PART A: MOTIVATION REPORT

1. Introduction

1.1. Background

Tamboerskloof is a predominantly residential suburb of Cape Town located on the slopes of Lion's Head and Signal Hill, adjacent to Bo Kaap and Gardens and forming one of the neighbourhoods which make up the City Bowl.

Named after the drums which watchmen beat from the slopes to alert farmers to the arrival of a ship, Tamboerskloof dates back to the 1650s when the Dutch settlers arrived.

Now a densely populated residential area, its close proximity to the CBD and easily accessible boundaries have led to several public safety, cleansing, and socio-economic challenges that the community seeks to address. Crime levels have steadily risen over the years, ranging from serious incidents to more opportunistic petty crimes, such as theft from vehicles, vehicle theft, graffiti, vandalism, and other minor thefts. In response, several property owners in specific streets have jointly funded security measures, and the installation of monitored CCTV cameras and guard huts, with foot patrols during the night, has yielded almost immediate positive results. The effectiveness of these measures has motivated a group of property owners to come together and pursue a sustainable solution to maintain and expand these measures for the benefit of the broader community. The focus of the solution pertains not just to public safety but upliftment of the area in general encompassing crime, cleanliness, biodiversity and social issues.

It is therefore proposed that a City Improvement District (CID) be established covering an area within the City of Cape Town (CCT), as defined below.

A CID is a community-driven venture, allowing the local community, property owners and local businesses to organise and fund improvements of specific areas within the City of Cape Town. By pooling their resources in a CID, individual property owners can enjoy the collective benefits of a well-managed area, a shared sense of communal pride, improved public safety and social responsibility.

Once applied for and approved by CCT, a non-profit company (NPC) is incorporated which executes the services detailed in the business plan funded by an additional property rate levied on rateable property located within the CID. The CID is established for an initial period of five years with an option to apply for another term with consent from the property owners agree.

1.2. Nature & Functions of a CID

In accordance with Section 22 of the Municipal Property Rates Act (MPRA) and the City's CID By-law, a municipality may designate an area as a City Improvement District (CID) to enhance and manage the area for the benefit of those who reside within the designated boundary. This is achieved by the municipality levying an additional property rate on property owners within the defined CID boundary. The additional rates collected are then remitted to the CID and spent in the defined area according to the approved business Plan. The amount of the additional rate is determined by the municipal property valuation and is derived from the budget outlined in the Business Plan, ensuring that the CID's objectives are met in a sustainable and transparent manner. The Non-Profit Company (NPC) will be governed by a board of directors, all of whom must be property owners within the CID area and serve on a voluntary, unremunerated basis. The board is responsible for overseeing the implementation of the approved Business Plan or for appointing accountable employees to carry out this function. The City of Cape Town provides regular and stringent oversight of the NPC's activities to ensure full compliance with all relevant legislation and adherence to the community-approved Business Plan.

1.3. Name

The proposed CID will be named Tamboerskloof CID (TBKCID).

1.4. Applicant

The applicant is the Chairperson of the Tamboerskloof CID Steering Committee:

Name: Bevis Hoets

Address: 14 Queen Street, Tamboerskloof, 8001

Email: bevis@tbkcid.co.za

The other members of the Steering Committee are:

- Tim Harris, 28 Milner Road, tim@tbkcid.co.za
- Simon Campbell-Young, 12 Brownlow Road, simon@tbkcid.co.za
- Trip Allport, 45 Milner Road, trip@tbkcid.co.za
- Murray von Hirschberg, 18 Burnside Road, murray@tbkcid.co.za
- Johan Le Roux, 3 Kenmore Road, johan@tbkcid.co.za
- Peter de Jong, 16 Leeukloof Drive, peter@tbkcid.co.za

1.5. Geographic Area

The proposed geographic area for the Tamboerskloof CID is effectively the upper section of Tamboerskloof whose boundaries are defined as follows:

Northern Boundary

Properties adjacent to Table Mountain National Park below Signal Hill

Eastern Boundary

The properties on the easterly side of Milner Road through to Poyser Road and then Poyser Estate.

Southern Boundary

Kloof Nek road from the intersection with De Hoop Avenue to Hastings Avenue, then northwards up Hastings Avenue to the intersection with Camden Street including erven 764, 761, 752, 749, 1170, 1003, 1074, 1357 and 1004 on the easterly side of Hastings Avenue. Then easterly along the northern side of Camden Street until Burnside Road but including erven 1086, 400, 1006 and 1005. Then southerly down Burnside Road to the junction with Leeuwenvoet Road. Then along the northern side of Leeuwenvoet Road to Carstens Street. Then north up Carstens to Brownlow but excluding ERF 294. Then along Brownlow Road till Milner Road.

Western Boundary

De Hoop Avenue

Tamboerskloof City Improvement District

Tamboerskloof City Improvement District

1.6. Strategic Objectives

Through the establishment of a City Improvement District (CID), Tamboerskloof has the opportunity to join over 54 other communities in Cape Town that have collectively funded supplementary service delivery to enhance their areas. If approved by the community and the City Council, a CID will be established to allocate resources strategically, aimed at improving Tamboerskloof in line with the following key objectives:

- Enhancing public safety through supplementary security measures such as monitored CCTV cameras, dedicated patrol and response vehicles, and guard huts staffed by patrolling guards, with potential support from dedicated law enforcement services.
- Increasing maintenance and cleansing by providing additional services for litter and leaf removal, clearing storm water drains, and keeping all street furniture and infrastructure clean and free of graffiti in public spaces.
- Environmental development through supplementary services aimed at upgrading public spaces within the area, including mowing, removal of invasive species, planting of indigenous species, weeding, and general beautification of parks, verges, and greenbelts. This also includes the potential addition of benches, bins, and play equipment where appropriate.
- Promoting social and economic development through coordinated efforts with qualified organisations to reduce the presence of street sleepers, vagrants, and bin pickers via comprehensive social reintegration programmes.

Core Principles

The TBKCID Steering Committee acknowledges that by voting in favour of establishing a CID for Tamboerskloof, the community is placing its trust not only in the legal framework governing CIDs but also in the integrity of the individuals leading this initiative. In response, the Steering Committee commits to the following principles throughout the establishment of the CID, as well as its subsequent management should the initiative be successful.

- **The principle of Tamboerskloof:** the single overriding ambition of establishing this CID is to improve our area for all who live, work and visit here and those who will do so in the future.
- **The principle of transparency** – all information relating to the management of a CID for Tamboerskloof will be readily available to all interested and affected parties. The Steering Committee, and subsequently directors, and any appointed managers will attend swiftly to concerns or requests for information.
- **The principle of value for money:** the unerring focus will be on ensuring that CID funds are deployed as efficiently as possible. A procurement policy will be drawn up to ensure that the most competent service providers are appointed to deliver the best services, taking into account that the lowest price does not always represent the best value for money. All service providers will be appointed via a fair and transparent tender process.
- **The principle of accountability:** TBKCID will ensure it complies with all legal, regulatory and statutory requirements in its establishment and management. Accountability to the community is critical and TBKCID will encourage active membership and engagement with community members.
- **The principle of communication:** TBKCID commits to regular, comprehensive communication of the steps in the establishment process and, thereafter, deployment and development of the CID. The onus will be on TBKCID to provide relevant information to interested and affected parties rather than them being required to seek it out.

In the preparation of this business plan, the TBKCID Steering Committee has focused on ensuring the services and projects proposed are consistent with the objectives of the City of Cape Town's Integrated Development Plan. Specifically, the plan aims to deliver supplementary services in accordance with the three foundations deemed essential to realise "A City of Hope", namely Safety, Basic Services and Economic Growth.

2. Proposed Services and/or Projects

2.1. Why does Tamboerskloof need a CID?

The Steering Committee embarked on the initiative to establish a City Improvement District (CID) for our area with the aim of making Tamboerskloof safer, cleaner and greener and uplift those in need. The ambition is to reduce crime as far as possible, keep our public spaces as safe as they can be for all to enjoy and improve our community's public areas and facilities. The City of Cape Town must and will deliver the services we pay for via our basic rates, but the vital need to allocate expenditure to the communities most in need, combined with other budgetary constraints, mean the municipality is not always able to deliver the scale of services that residents would like to enjoy.

2.2. Urban Management Survey

The establishment of a City Improvement District (CID) must follow the formal process outlined by the City of Cape Town's by-laws and policies. One of the earliest and most critical steps in this process is conducting an Urban Management Survey (UMS) to ensure the CID aligns with the needs and expectations of the community. The survey is designed to gather valuable feedback from property owners on key issues such as Public Safety, Urban Management, Environmental Development, and Social Upliftment.

The survey results form the foundation for the business plan, guiding the allocation of the budget based on the community's identified priorities. This business plan, along with the proposed budget, becomes the basis for eligible ratepayers to decide whether to support the establishment of a CID in our area.

The UMS for Tamboerskloof was launched on 17th August 2024, requiring a minimum of 20% of property owners within the defined area to participate in order for the CID initiative to proceed. Additionally, feedback from other interested stakeholders is encouraged. Within two weeks, the survey had surpassed the 20% participation threshold, with further responses from various other respondents.

The UMS results were consistent, showing strong community support for improving the Tamboerskloof area and backing the establishment of a CID to achieve these goals.

Key highlights:

A detailed analysis of the survey results can be found on our website, but the key findings are summarized below:

- Respondent Profile: 90% of respondents are property owners, with 84% considering their Tamboerskloof home as their primary residence.

- Long-Term Residency: More than 50% of respondents have lived in Tamboerskloof for over a decade.
- Perceived Safety: The majority of respondents feel safe in their homes during the day, at night, and while walking the streets during the daytime. However, more than 70% feel unsafe walking the streets at night.
- Areas of Concern: 50% of respondents feel unsafe using the various “steps” which traverse Tamboerskloof (for example Carstens Steps and others), and 70% feel unsafe on the mountainside, although more than two-thirds still walk, run, or hike there.
- Crime Incidents: Unfortunately, 75% of respondents have been victims of crime, with burglary (63%) and theft from motor vehicles (58%) being the most common.
- Existing Security Measures: 78% report that security measures such as cameras, lights, and guards are already in place on their streets, with 86% believing these measures have reduced crime to some extent. However, in 75% of cases, these measures are funded by only a few residents.
- Safety Perceptions: Just under 50% of respondents feel less safe now than when they first moved to Tamboerskloof, and 94% believe that more patrols would improve public safety.
- Cleanliness: While nearly 80% believe the City of Cape Town keeps Tamboerskloof reasonably clean, 73% would like to see more street cleaning.
- Environmental Improvements: 87% support the planting of more indigenous plants and trees.
- Fire and Invasive Species: Although only 44% are concerned about fire risk, 75% believe invasive species should be cleared from the mountainside and 54% from public spaces.
- Vagrancy and Crime: Almost 88% of residents consider vagrancy to be a problem, with 90% linking it to petty crime and 87% associating it with litter in the area.
- Social Development: An overwhelming 95% of respondents are in favour of supporting relevant, qualified NGOs working to help people off the streets, while just over 66% of respondents support the concept of Tamboerskloof residents taking appropriate steps to provide support to those less fortunate in and around the area

To address the improvements outlined by the community in the UMS, the TBKCID Steering Committee proposes the introduction of supplementary services alongside those provided by the City of Cape Town (CCT). The CID’s operations will focus on four main pillars: Public Safety, Maintenance & Cleansing, Environmental Development, and Social & Economic Development. Effective communication of the CID’s efforts and achievements will be essential to keep stakeholders informed and demonstrate the value of the additional rates being contributed.

2.3. Improving Public Safety

Improving public safety is invariably the driving motivation behind the establishment of any CID. Tamboerskloof, fortunately, does not suffer from excessively high crime rates but as evidenced by the results of the UMS, residents do have a number of safety and security concerns.

Solutions for improving public safety and security are numerous. To deploy the most effective solution possible for TBKCID, a fully comprehensive review of the area was conducted by an independent public safety expert. It is important to note, this provider does not offer any public safety services directly and thus offers a truly objective view of what is required.

Input was also gratefully received from TBKWatch which is very familiar with crime patterns in the area. The efficacy of existing public safety measures in place funded by residents was also assessed. The primary phase of resident-funded safety measures was cameras and speakers which were already effective in reducing crime. The positive impact was amplified by the addition of guard huts with guards patrolling during the hours of darkness and monitored by manual checkpoints. Tamboerskloof has several unique aspects such as several sections of steps which pose unique security challenges. It is therefore envisaged that guard huts in key positions with security patrol vehicles could form a multi-layered public safety programme.

From all of the above, it was determined that a comprehensive public safety solution for TBKCID should comprise the following measures:

- A network of monitored CCTV cameras around the mountainside perimeter of the defined area. The requirement is anticipated to be approx. 50 cameras which will be new hardware installed on a leased basis.
- A network of monitored CCTV cameras at strategic locations within the defined area. The requirement is anticipated to be approx. 40 cameras in total. Where possible, the existing installed network of approx. 30 cameras will be redistributed taking into account the increased security along the perimeter will reduce the required camera density internally. The balance of new cameras required will be new hardware installed on a leased basis. Over time, some of the existing installed base of cameras may need to be replaced. New hardware will be purchased.
- TBK Watch already maintains a network of licence plate recognition cameras (LPRs) at most main vehicle entry points. TBKCID will augment this network where necessary and over time work with TBK Watch to replace outdated hardware. Additional and replacement cameras will be purchased.
- TBKCID will thus adopt a blended model of leased and owned cameras which is cost efficient in the short-term and offers flexibility with respect to the installation going forward.
- A maintenance contract will be entered into with an accredited provider to ensure all cameras are maintained in full working order.
- The existing installed network of approx. 20 loudspeakers will also be redistributed reflecting the differing internal security needs once greater security is in place along the perimeter.

- One dedicated patrol & response vehicle in the area 24/7. The vehicle will bear the livery of the appointed provider but also carry TBKCID branding. Officer/s therein will wear the uniform of the appointed public service provider with TBKCID branding if possible.
- Expansion of the current installed base of six guard huts up to a maximum of 12 huts located strategically around the area. The locations are anticipated to be predominantly at the entry/exit points to the various “steps” within Tamboerskloof but also adjacent to mountainside access points. As per the contract for the existing huts, the additional huts will be leased, manned during the hours of darkness and with the patrolling guards monitored by means of check in points. Guards will wear the uniform of the appointed public service provider with TBKCID branding if possible.
- A third-party control room will be appointed to monitor the CCTV network, receive alerts from the guards manning the huts and from members of the public (via all potential communication channels including a dedicated phone/WhatsApp number) and dispatch and direct response accordingly
- Increased security on the mountainside most likely in partnership with the existing Cobra Mountain Men patrol via a two-man crew patrolling over a 12-hour shift, 365 days a year
- Budgeting to ensure the existing gated access to the mountainside is well-secured and maintained
- There are numerous access points to the mountainside from within Tamboerskloof some of which have been secured via the installation of fencing with gates. Monitoring and controlling these access points is vital to safeguarding and improving public safety in the area. TBKCID has allocated budget to the repair and/or replacement of these facilities where required. Each installation will be reviewed on a case-by-case basis to establish ownership and ensure TBKCID only allocates expenditure to non-privately owned assets and with the agreement of the property owner. Where fences and/or gates may have historically been installed without appropriate permissions, TBKCID will only allocate expenditure to repairs and/or replacement, once the relevant authorisation has been secured.

A suitably qualified camera monitoring company will be appointed to monitor the camera network using proactive monitoring software which generates alerts in accordance with set parameters. It is important to note that while all cameras will be recording footage at all times and this footage will be stored for an agreed period of time which will be at least a number of weeks, active monitoring of the majority of the internal cameras will only take place during the hours of darkness. Given the amount of foot traffic during the day, the quantity of alerts which would be generated would be challenging for any control room. Cameras along the mountainside perimeter and known hotspots, however, will generate alerts 24/7.

It is vital to state that cameras will monitor public spaces only and no cameras will monitor private properties or land. This is in accordance with all relevant CCTV legislation, by-laws and the CID’s strict mandate which is public spaces only.

Crucial to the efficacy of the proposed public safety solution will be seamless coordination and communication between the various service providers, each of whom will be selected on a fair and transparent basis. The three core elements of the control room, guards manning the huts and response vehicles and their officers will all be in radio contact via a secure private channel. The control room will be at the heart of operations monitoring the cameras, receiving alerts and directing response accordingly. Close cooperation with TBK Watch is also vital particularly with regards to its extensive experience in managing alerts from the LPR cameras and liaising closely with SAPS. TBKCID and its appointed public safety service providers will work to maintain and strengthen these relationships with both TBK Watch and SAPS.

ERF 81 poses a particularly complex public safety challenge given its ownership, the divergent individuals who reside there and the thoroughfare it provides into Tamboerskloof. It would be naïve to suggest any structure or organisation can deliver an all-encompassing solution which will both eradicate the public safety issues posed by this ERF and uplift those who reside there but TBKCID will dedicate resources via both its Public Safety and Social & Economic Development portfolios to ameliorate the situation to the extent possible.

As per the CID's mandate, no expenditure will be allocated to ERF 81 itself which is privately owned property, but via TBKCID's Public Safety budget stringent measures to monitor the access from ERF 81 to Tamboerskloof will be introduced. These will include monitored cameras surveying the public spaces via which foot traffic most frequently passes from ERF 81 into the broader Tamboerskloof area, additional lighting in these areas, patrols and where feasible, a physical barrier (i.e. fence) in public space.

Any physical barriers will be introduced not to prevent the movement of individuals but rather funnel movement into formal public space access monitored by cameras rather than via porous boundaries. The intention being two-fold. Firstly, in the event a crime is committed in the area and a suspect is tracked by the camera network and/or response exiting into ERF 81, SAPS can be informed and provided with all relevant information and camera footage once a case is opened. Secondly, in the event individuals are detected moving from ERF 81 into Tamboerskloof at times which could reasonably be deemed to be potentially without legitimate cause, they can be monitored and potentially tracked by response.

Local residents have been engaged for many years in various efforts to improve safety and security of the land both for those who reside there and also neighbours thereof. A key development was the acknowledgement of ownership in 2020 by the Department of Defence and subsequent deployment of military personnel to the ERF. A small group of dedicated residents continues to engage successfully with representatives of the landowner who do intervene in response to reports of anti-social behaviour on ERF 81. TBKCID will support and continue these efforts.

These measures will be supplemented by endeavours planned under TBKCID's Social and Economic Development programme which are detailed in section 2.6 of this business plan.

The UMS results highlighted that many residents are concerned about safety when spending time on the mountainside above Tamboerskloof. Addressing this security challenge is complex. While a CCTV network could be a useful tool in combating crime in this area, the number of cameras required would be impractical. Additionally, the effectiveness of cameras depends on a rapid response, which cannot always be guaranteed in this location.

In an effort to reduce crime incidents on the mountainside directly above Tamboerskloof, the TBKCID has engaged with the Cobras Mountain Protection Team to explore the possibility of expanding their patrols to cover our mountainside perimeter. On an ongoing basis, the efficacy of the public safety measures deployed will be constantly appraised and adjusted if necessary, in response to either their potency or changing patterns in threats to public safety.

Consistency with CCT's IDP and section 22(4) of the Local Government: Municipal Property Rates Act, No. 6 of 2004 (the "MPRA"). The proposed services are consistent with CCT's IDP objectives 5 and 6 namely "*Effective law enforcement to make communities safer*" and "*Strengthen partnerships for safer communities*" as well as the objective 6.1 "*Partnerships for community safety programme*."

Description	Year 1	Year 2	Year 3	Year 4	Year 5	Total
Public Safety	3,960,000	4,257,000	4,576,275	4,919,496	5,288,458	23,001,229
CCTV Monitoring	451,200	451,200	480,000	504,000	541,800	2,428,200
Camera leasing	504,000	541,800	582,436	626,118	673,076	2,927,430
CCTV / LPR Cameras	-	50,000	50,000	50,000	-	150,000
Cleaning for cameras	100,000	50,000	-	50,000	-	200,000
Annual Total	5,015,200	5,350,000	5,688,711	6,149,614	6,503,334	28, 706,859

2.4. Maintenance and Cleansing

The TBKCID covers a relatively small and urbanised area, meaning its maintenance and cleansing efforts will primarily focus on street cleaning, storm water clearing, and litter removal. These services will be provided across all streets within the defined area, as well as in public parks and open spaces, including St Michael's Road Park, Leeukloof Green Belt, Poyser Park, Burnside Park, and Camden Park, all of which are frequently used by Tamboerskloof residents.

These services will be outsourced to a qualified third-party contractor, who will supply a small team (approximately three staff members) working five days a week, at reasonable working hours to be finalised, to ensure the streets remain clean and well-maintained. Litter, leaves, and other debris will be collected and responsibly disposed of.

The team will wear high-visibility jackets clearly displaying the TBKCID logo and name badges for easy identification. To ensure consistency, the service provider will aim to assign the same personnel regularly, allowing them to become familiar with the area and its residents.

Additionally, the Cleansing & Maintenance team will be responsible for keeping street signs, traffic signs, and municipal street furniture clean and graffiti-free. They will also monitor storm water drains, ensuring they remain clear and reporting any blockages or other municipal issues to the supervisor, who will log them as C3 service requests. Under the projects proposed later in this plan, a number of additional bins, and dog waste disposal bags dispensers where possible, will be installed in the area and these will be emptied on at least a weekly basis, and replenished where necessary, by the cleansing and maintenance team.

With specific respect to Urban Maintenance, the results of the UMS indicated some frustration at the congestion caused by drop off and pick up times at the German International School. The school is understood to be investigating steps that can be taken to alleviate this congestion and TBKCID will engage with the school with the aim of supporting these endeavours.

Work in this portfolio will inevitably overlap with that of the Environmental Development portfolio.

Consistency with CCT's IDP and section 22(4) of the Local Government: Municipal Property Rates Act, No. 6 of 2004 (the "MPRA").

The proposed services are consistent with CCT's IDP objective number 1 *"Increased jobs and investment in the Cape Town economy"*, objective 9 *"Healthy and sustainable environment"* and objective 11 *"Quality and safe parks and recreational facilities supported by community partnerships"*.

Description	Year 1	Year 2	Year 3	Year 4	Year 5	Total
Cleansing Services	540,000	580,500	624,038	670,840	721,153	3,136,531
Urban Maintenance	25,000	26,875	28,891	31,057	33,387	145,210
Annual Total	565,000	607,375	652,929	701,897	754,540	3,281,741

2.5. Environmental Development

Although located on the slopes of Table Mountain, Tamboerskloof is primarily an urban area. Within the defined CID boundary are St Michael's Road Park, Poyser Park, and the Leeukloof greenbelt, along with an adjacent section of mountainside. While Burnside Park and Camden Road Park fall outside the defined area, they are frequently used by Tamboerskloof residents.

The TBKCID will ensure that these spaces are well-maintained for the benefit of all, offering supplementary services to those provided by the City of Cape Town's Parks & Recreation Department. These additional services will include:

- Collection and removal of litter,
- Collection and removal of leaves,
- Trimming of vegetation,
- Tending to and planting public verges,
- Mowing grass and verges,
- Removal of invasive species (in line with NEMBA legislation and CCT guidelines), which will be replaced with appropriate indigenous plants or trees. Where possible, TBKCID will collaborate with the CCT Arboretum, which offers free trees and plants to communities committed to maintaining them.

- Trimming foliage to ensure clear visibility for CCTV cameras.

Tamboerskloof, like many other suburbs in Cape Town, enjoys a unique location on the urban edge of Table Mountain National Park, sitting on the slopes of Signal Hill and Lion's Head. With this location comes several environmental challenges, including the risk of fire and the need to control invasive species.

The TBKCID will develop a comprehensive plan to reduce fire risk and promote the growth of indigenous species. Working with expert advisors, TBKCID will clear invasive species from public spaces and collaborate with SANParks to minimize the fire risk posed by invasive plants near the area.

Additionally, information and resources will be provided to homeowners regarding their responsibilities in reducing fire risk and the steps they can take to make their homes more fire-resistant. Consistency with CCT's IDP and section 22(4) of the Local Government: Municipal Property Rates Act, No. 6 of 2004 (the "MPRA").

The proposed services are consistent with CCT's IDP objective number 9 *"Healthy and sustainable environment"*, 9.1 *"Environmental and biodiversity management programme"* and 11.2 *"Partnerships for quality public spaces programme."*

Description	Year 1	Year 2	Year 3	Year 4	Year 5	Total
Environmental Development	150,000	161,250	173,344	186,345	200,320	871,259

2.6. Promotion of Social and Economic Development

Tamboerskloof, as an entire suburb, abuts the Cape Town CBD and while the area proposed for a CID is somewhat removed, the effects of the challenging socio-economic conditions facing many people in Cape Town are still felt. Vagrants often frequent the area, particularly on refuse collection day, and the evidence of drug use is clear.

While the appointed public safety provider's patrols are intended to deter the presence of any individuals without an obvious reason to be in the area, a more comprehensive solution is required which not only meets the desires of the local residents who would prefer not to have vagrants frequenting the area, but more importantly, meets the needs of those living on the streets or in neighbouring informal settlements.

The TBKCID seeks to replicate the successful approaches of neighbouring CIDs in addressing social upliftment through a "hand-up" rather than a "hand-out" philosophy. This core principle of social reintegration has been effectively implemented in Camps Bay and Clifton, in partnership with the NGO Ignisive.

While various government and municipal entities are responsible for managing homelessness, vagrancy, illegal dwellings, and the associated crime, each situation—whether involving individuals, families, or children—requires a tailored approach in line with prescribed procedures. Navigating these processes demands expertise, and just as public safety, cleaning, greening, and environmental development will be outsourced to qualified third parties, TBKCID proposes partnering with an experienced organisation like Ignisive to provide lasting solutions for social upliftment in the Tamboerskloof CID area.

It's essential to emphasize that the solution must extend beyond the defined CID boundary to the broader Tamboerskloof area. Property owners, residents, and workers in the defined area frequently pass through lower Tamboerskloof, either by car or on foot, and many use Burnside Park and Camden Park. Additionally, vagrants and street sleepers in the lower sections often move into the upper areas, necessitating a comprehensive geographic solution that benefits the entire community.

TBKCID aims to deliver a sustainable approach by collaborating with a capable organisation to address vagrancy and its effects—not by merely relocating the problem, but by tackling the root causes and helping affected individuals reintegrate into society. These programmes will include:

- Providing funding for Responsible Giving campaigns, working with residents and guest houses to reduce direct handouts to street people,
- Establishing a dedicated liaison with SAPS and the City of Cape Town to ensure Tamboerskloof's concerns are addressed by these authorities,
- Building a database of contacts within public and non-governmental organisations to supplement resources in the area,
- Expanding the Community Stewards Programme, which selects vetted individuals from the local homeless community to provide crime intelligence and transition to formal employment,
- Acknowledging the presence of bin-pickers and establishing a network of vetted individuals to coordinate this activity and discourage non-local vagrants from entering the area,
- Offering social and fieldwork services, including practical support such as document replacement, family reunification, shelter access, and rehab programmes,

- Facilitating reintegration support through life skills training and employment opportunities, particularly in the Environmental Development and Cleansing focus areas, in collaboration with an appropriate NGO.

An additional factor attracting bin-pickers is the well-intentioned practice of leaving food or other items for street people. TBKCID plans to allocate meaningful monthly contributions to a structured feeding scheme run by a reputable NGO in the area. Once the CID is established, residents will be encouraged to stop leaving street side donations, knowing that TBKCID is making targeted contributions on their behalf. Furthermore, residents will be invited to donate clothing and household goods to the relevant NGO, which will manage the sorting and distribution of these items to those in need.

Addressing vagrancy and bin-picking will not only contribute to Social and Economic Development but also enhance Public Safety for the community.

Description	Year 1	Year 2	Year 3	Year 4	Year 5	Total
Social Upliftment	175,000	188,125	202,234	217,402	233,707	1,016,468

2.7. ERF 81

TBKCID believes the specific experience and skills of organisations such as Ignisive can be utilised to alleviate some of the complex social challenges posed by ERF 81 and its residents. A one-stop solution simply does not exist but with the benefit of a committed budget, the establishment of a CID can facilitate consistent funding for an experienced, competent team to engage and work with the residents of ERF 81 to help reintegrate into formal society those who choose to do so.

Efforts in this regard will take considerable time and require extensive engagement with the owners of the land, multiple local, provincial and national departments and competent third parties to coordinate such. Focus will be particularly on the well-being of minors. TBKCID will also liaise with the relevant authorities to ensure the location is appropriate for the various animals being maintained on the ERF and that their well-being is prioritised. Those responsible for the upkeep of the ERF will also be engaged to address the general fire risk the dwellings pose.

TBKCID will engage with stakeholders in Bo-Kaap who share the same objectives of reducing the negative social and criminal effects which unfortunately emanate from ERF 81.

ERF 81 poses a particularly unique challenge in many respects and a conclusive "solution" simply cannot be guaranteed but TBKCID commits to allocating what resources it can to explore all possible solutions in partnership with appropriately competent and experienced third-parties.

Consistency with CCT's IDP and section 22(4) of the Local Government: Municipal Property Rates Act, No. 6 of 2004 (the “MPRA”).

The proposed services are consistent with CCT's IDP objective number 15 "*Building a more spatially Integrated and Inclusive City.*"

2.8. Marketing & Communication

Regular comprehensive newsletters will be sent to all interested stakeholders via email and posted on the TBKCID website and Facebook page. These will also be shared through the active WhatsApp groups within Tamboerskloof, including the Tamboerskloof Community WhatsApp, and sent to the local ward councillor and sub-council manager. An archive of past newsletters will be available on the website.

Day-to-day updates will be provided through Facebook and WhatsApp, keeping the community informed of ongoing efforts to improve the area. Key statistics on incidents detected by the CCTV network will be compiled and shared regularly.

The CID manager will ensure that changes in property ownership are promptly updated in the database. New property owners will be welcomed with an introduction to TBKCID, outlining its activities and the associated costs, and will be encouraged to apply for membership.

2.9. Projects: Parks/POS

With the establishment of the CID, a comprehensive clean-up operation will be carried out of all the public open spaces and parks in and adjacent to the area. This will include weeding, removal of invasive species where appropriate, planting of indigenous trees and plants, pruning of trees and any other improvements required such as repairs to pathways. In this endeavour, TBKCID will liaise with the various volunteer organisations which are already maintaining and working to improve the parks.

Where appropriate, benches and bins will be installed with the latter being emptied regularly by the TBKCID cleaning team. Dispensers for dog poo bags, potentially compostable, will also be installed.

A comprehensive plan for the enhancement of the St Michael's Road Park has already been drawn up and partly executed by the Friends of the Park. Budget has been earmarked to work with the Friends on the completion of the plan the most significant element of which is improving and promoting access to the space.

Clean-up efforts in Poyser Park will focus on not only removing invasives but sensitive pruning to "lift" vegetation thereby improving visibility through the park and removing locations for vagrants or those with criminal intent, to shelter out of sight. A small-scale children's play area and seating will be installed.

The Leeukloof green belt area will be enhanced by the removal of invasive species in line with the city's guidelines, for the sensitive pruning of trees and vegetation to eradicate areas for anyone to shelter and the addition of benches and bins.

Other projects include repairing or replacing the existing guard railings in place along certain roads, e.g. Queens Road, Brownlow Road. Some clearing of trees and vegetation will be required around the mountainside perimeter to ensure visibility for the CCTV network to be installed. This will be carried out by a suitably qualified and competent service provider and done with sensitivity to preserving the environment as far as possible.

Experience of crime patterns in Tamboerskloof as documented by security providers and TBK Watch clearly indicates that a key aspect of improve public safety will be monitoring and limiting access to Tamboerskloof from ERF 81. It is envisaged that access at the Poyser Park area will be controlled via the installation of high security fencing incorporating a gate to ensure those with legitimate reason can access to and from the mountainside. This will be managed via a mechanism to be determined but will take the form of either intercom, security panel with code or a locking mechanism with a specific code. This will be supported by cameras monitoring these security measures in the public space. Again, the intention being not to prevent movement through the area but rather funnel that movement through a specific channel of public space being monitored by cameras.

Description	Year 1	Year 2	Year 3	Year 4	Year 5	Total
Replace/repair railings	30,000	10,000	10,000	-	-	50,000

Description	Year 1	Year 2	Year 3	Year 4	Year 5	Total
Parks Improvements	150,000	150,000	50,000	50,000	-	400,000
Fencing/gates	150,000	100,000	100,000	-	-	350,000
Clearing for cameras	100,000	50,000	-	-	-	150,000
Annual Total	400,000	300,000	150,000	50,000	-	900,000

3. Financial Impact of the CID

3.1. Funding of the CID

Financial Impact of the CID

The Expenditure Budget for each year of the Business Plan

Year 1: R7, 224,948

Year 2: R7, 469,510

Year 3: R7, 866,541

Year 4: R8, 320,033

Year 5: R8, 889,035

The additional rates required to fund the annual budget escalates with an average of 5.1% over the 5-year term.

Budget allocation per Portfolio:

• Public Safety	68.0%
• Cleansing Services	7.5%
• Environmental Enhancements	2.1%
• Urban Maintenance	0.3%
• Social Upliftment	2.4%
• General Expenditure	10.1%
• Depreciation	0.2%
• Repairs & Maintenance	0.1%
• Projects	6.0%
• Capital Expenditure	0.3%
• Contribution to the Rolling Bad Debt Reserve	3.0%

In line with the City's CID By-law, the Board of Directors is annually required to review the term budget and prepare an overall annual budget for the next financial year based on the specific needs of the area as set out in the Business Plan. The budget is funded by an additional property rate levied on the municipal valuation of all properties within the TBKCID boundary. Additional rates attract VAT @ 15%.

The impact on individual property owners in the outer years of the CID term may vary due to valuation fluctuations caused by successful valuation objections, subdivisions, new developments, court amendments, implementation of a new General Valuation or Supplementary Valuation causing the CID budget to be spread over an increased or reduced total municipal valuation base.

Property owners who receive a full or partial rates rebate will not pay additional rates. It is however the responsibility of the property owner to apply for such relief.

3.2. Calculation of the additional rate in the first year

The additional rate is expressed as a 'rate-in-the-rand' and is calculated by dividing the TBKCID budget total for that year with the total municipal valuation of all the eligible properties in the TBKCID area.

The TBKCID budget and additional rates are approved by Council with the City's budget and remains constant for the financial year commencing 1st of July, and will be recalculated annually by the City during the City's budget process.

The CID By-law allows for a differentiation in additional rates between categories of rateable properties and as such a residential and non-residential additional rate is applicable in the TBKCID.

The individual CID contribution for residential and non-residential properties is calculated as follows, where R.0.XXXXXX represents the additional rate 'rate-in-the-rand':

- Property municipal valuation x R 0.XXXXXX = Annual CID contribution (VAT exclusive)
- Annual CID contribution (VAT exclusive) ÷ 12 = Average monthly CID contribution (VAT exclusive)
- Average monthly CID contribution (VAT exclusive) x 1.15 = Average monthly CID contribution (VAT inclusive).

For example, the monthly CID contribution for a property assuming a 'rate-in-the-rand' of for Residential and Non-Residential would be calculated as follows:

Residential: (R 1000 000, 00 * R0, 001397 = R 1 397, 00 (Annual contribution VAT excl)) / 12 = R 116.42 (Monthly contribution excl VAT)

Non-Residential: (R 1000 000, 00 * R0, 002126 = R 2 126, 00 (Annual contribution VAT excl)) / 12 = R 177.17 (Monthly contribution excl VAT)

The City of Cape Town will pay the TBKCID a monthly amount equivalent to one-twelfth of its approved budget minus 3% which is retained by CCT as a rolling bad debt reserve. The contribution to the rolling bad debt reserve will be kept in a ring-fenced account for the TBKCID.

At the end of the financial year the City reconciles the billing with the CID budget and any under or over billing is offset against the ring- fenced rolling bad debt reserve account to avoid any cash flow impact on the CID in the case of under billing. This account is subsequently compared

with the arrears as at the end of the financial year. When the latter is less than the balance in the rolling bad debt reserve account, 75% of the difference is paid to the CID as per the Finance Agreement concluded between the City and the CID.

3.3. Expected cost in subsequent years

All CIDs operate on five-year terms and this business plan and associated budget pertains to the proposed term of 1 July 2025 to 30 June 2030. Cost increases in all budget lines are to be anticipated given inflation and the TBKCID budget factors in an average increase of 5.3% in ongoing expenditure.

Budget increases are not entirely linear, however, given the fixed cost of projects. The actual percentage increase in the overall expenditure of TBKCID is outlined in the table below.

Description	Year 1	Year 2	Year 3	Year 4	Year 5	Average Percentage Increase
Total expenditure	7,224,948	7,469,510	7,866,541	8,320,033	8,889,035	-
Annual increase	-	3.4%	5.3%	5.8%	6.8%	5.3%

4. Proposed Management Structure

Upon receiving Council approval for the establishment of TBKCID, a non-profit company (NPC) will be incorporated in accordance with the Companies Act. The members of the Steering Committee will serve as the founding directors of the NPC until a Members' Meeting is held within six months of incorporation.

Membership of TBKCID is free and open to all eligible ratepayers within the defined area, upon completion of the required application forms. Only members of the company will have voting rights on matters related to TBKCID.

At the Members' Meeting, a Board of Directors will be elected, with nominees required to be members of the NPC. The Board will then elect a Chairperson and assign specific portfolios. The directors will oversee specific portfolios, as outlined in this Business Plan.

A part-time CID manager/administrator will be appointed to oversee the operations of appointed service providers, handle communication of CID matters to stakeholders, and manage the administrative tasks required for the efficient functioning of TBKCID. The CID manager/administrator will report directly to the TBKCID Board. Their hours will be flexible and vary each month according to needs but are envisaged to be approximately half those of a standard full-time employee.

4.1. Membership

It is important to note that only registered members are eligible to vote on CID matters. Membership is obtained through the completion of a simple two-page application form. Additional documentation is required for properties owned by corporations or trusts.

All additional ratepayers are strongly encouraged to become members, and TBKCID will actively communicate this information, urging those eligible to apply.

4.2. Procurement Policy

A comprehensive procurement policy will be developed and published on the TBKCID website detailing how service providers will be appointed for ongoing and ad hoc services to ensure transparency and accountability.

4.3. Oversight & Accountability

While the board of the CID, in conjunction with the appointed CID manager, will be responsible for ongoing operations and deployment of the budget, CIDs are subject to stringent external scrutiny.

- The NPC will have a memorandum of incorporation (MOI) as prescribed by the City;
- Monthly income and expenditure reports must be provided to CID Branch;
- Annual budgets, and mid-year revisions thereto, are subject to approval by CID Branch;
- A qualified external accountant will be appointed;

- An IRBA-registered external auditor will be appointed to conduct the annual audit;
- Audited annual financial statements must be provided to CID Branch by 31 August each year;
- Audited annual financial statements and an annual report are provided to the sub-council manager and CID branch;
- Regular board meetings will be held, the dates of which will be published in advance on the TBKCID website. The first 30 minutes of each meeting will be open to non-Board members to attend to raise queries or issues pending compliance with the attendance criteria as specified in the MOI; and
- A political representative, and alternative, will be appointed to the Board as an observer by the Executive Mayor.

4.4. Complaints

A complaints policy will be drafted and published on the TBKCID website ensuring that additional rate payers and any other affected parties know how to raise issues in the first instance and escalate them should a satisfactory response not be forthcoming.

5. Permissible Amendments

Should it be decided at any point in the future that the geographical boundaries of TBKCID should be amended, such change would have to be implemented via the formal process as stipulated in terms of section 26 of the CID By-law.

Should it be deemed necessary to deploy additional services which are not specified in this business plan but do not constitute material deviations, amendments can be requested under the terms of section 25 of the CID By-law. Any such request would require appropriate consideration by the board of directors and collaboration with any relevant department at CCT.

Part B

TAMBOERSKLOOF IMPROVEMENT DISTRICT (TBKCID)

TERM BUDGET

1st July 2025 to 30th June 2030

Proposed Establishment of Tamboerskloof Improvement District

*** Explanatory note 1: This template serves as a guide for steering committees when compiling their proposed public participation plan for approval by the Executive Director as contemplated in section 6(2) of the CID By-law. The template provides examples of a wide range of notification and consultation methods that may be employed. The steering committee should identify methods that would be both meaningful and cost-effective, taking into account the particular characteristics of the local community of the proposed CID. Where the proposed methodology deviates from any mandatory requirements in terms of the By-law, the steering committee must motivate such deviation to Sub-Council, NGOs and any other focus groups the program.

*** Explanatory Note 2: “local community” in relation to a CID-

means the body of persons comprising individuals falling under one or more of the following categories –

- (a) property owners in the district, irrespective of whether or not they will be liable for paying the additional rate;
- (b) residents of the district;
- (c) tenants and body corporates in the district;
- (d) any civic organisations and non-governmental, private sector or labour organisations or bodies which are involved in local affairs in the district affected by the proposed improvement or upgrading of the district.

PUBLIC PARTICIPATION PLAN (required under s. 6(2) of CID By-law)					
Proposed Methods of Notification (requirement under s. 6(7) of CID By-law)					
Notification Medium	Details	Targeted Interested & Affected Party (“I&AP”)	By-law	Policy	Deviation sought?
Internet	Steering Committee’s website at www.tbkcid.co.za	Local community & proposed Additional Rate Payers (ARPs)		Clause 9.4.3	N
Email notification	Email documents & notices to email addresses of proposed ARPs- (a) contained in the City’s records; ¹ and/or (b) listed in the steering committee’s register of members of the local community (clause 9.3).	Proposed ARPs	s. 6(7)(a)(i)	Clause 9.4.1	N
	Email documents & notices to email addresses of- (a) local community members listed in the steering committee’s register of members of the local community (clause 9.3); and (b) NGOs and other community organisations carrying on activities in the proposed Tamboerskloof CID, as listed in the steering committee’s register of members of the local community. ²	Local Community	s. 6(7)(a)(ii)	Clause 9.4.1	N
Notification Medium	Details	Targeted Interested & Affected Party (“I&AP”)	By-law	Policy	Deviation sought?
Hand deliver	Deliver relevant documents or notice to: (a) Those ARPs for whom the steering committee does not have email addresses; and (b) Members of the local community contemplated who have not provided email addresses for purposes of the written notice.	Proposed ARPs & Local Community	s. 6(7)(b) read with s.1 definition of “written notice”.	Clause 9.4.1	Y – hand deliver rather than registered mail

¹ The City will provide the steering committee with those contact details, which ratepayers have provided to the City. In terms of a POPI Act declaration signed by the steering committee, personal information received from the City can only be used for the CID establishment process and furthermore may not be shared or disclosed to third parties unless the third party was appointed by the steering committee and has signed the same undertaking.

² The steering committee should identify NGOs and community organisations (such as churches, clubs and social welfare organisations) carrying out activities in the proposed district and list their names and contact details in the steering committee’s register of members of the local community.

Proposed Establishment of Tamboerskloof Improvement District

Email notification/Physical meeting	Over and above the public meetings required in terms of section 6 of the By-Law; (a) The steering committee shall convene one or more focus groups for purposes of conveying information about, (b) Eliciting comment on, both draft and final business plans, and (c) Group(s) should consist of between 3 to 15 participants.	Sub-Council, NGOs and any other focus groups		Clause 9.8	N
Newspapers	Newspaper advertisements ³ in: (a) The Atlantic Sun	Proposed ARPs & Local Community	s. 6(7)	Clause 9.4.4	Y
Public Notices	Public notices to be affixed at the following locations: (i) Kloof St Library at 122B Kloof St, Gardens, Cape Town 8001 (ii) The Blue Café, 13 Brownlow Road, Tamboerskloof (iii) The German International School, 28 Bay View, Tamboerskloof	Proposed ARPs & Local Community	Not a legal requirement	Not a legal requirement	
Other means	Distribution of fliers and Broadcasts via social media channels and messaging apps i.e. Facebook and WhatsApp Groups	Proposed ARPs & Local Community		Clause 9.4.5	N
A. REGISTER OF THE LOCAL COMMUNITY					
Proposed Date	Proposed Action	Content of Register	By-law	Policy	Deviation sought?
June 2024	Open and maintain a register of member of the local community. “local community” in relation to a CID- means the body of persons comprising individuals falling under one or more of the following categories – (a) property owners in the district, irrespective of whether or not they will be liable for paying the additional rate; (b) residents of the district; (c) tenants and body corporates in the district; (d) any civic organisations and non-governmental, private sector or labour organisations or bodies which are involved in local affairs in the district affected by the proposed improvement or upgrading of the district.	Names, contact details & addresses of persons listed in s. 6(8) of the By-law.	s. 6(8)	Clause 9.3	N
B. OBTAIN INPUT FROM I&AP					

³ If a local community consists of a large population whose first language is not English or Afrikaans, the steering committee may need to place their notices in a local community newspaper which is published in that language.

Proposed Establishment of Tamboerskloof Improvement District

1. Focus Groups					
Proposed Date	Proposed Action	Targeted Interested & Affected Party (“I&AP”)	By-law	Policy	Deviation sought?
Dec 2024/Jan 2025	Convene focus groups consisting of the following groups of people: (i) [e.g.] Representatives of NGOs in local community; (ii) [e.g.] Representatives of any neighbourhood watch association in the local community and Community Policing Forum members; (iii) ARPs	Local Community & Proposed ARPs		Clause 9.8	N
2. First Public Meeting					
(a) Notice of First Public Meeting

Feedback from Urban Management Survey 2024

Background

- A key step in the process to establish a City Improvement District (CID) is the Urban Management Survey (UMS).
- The survey asks the community to provide feedback on various aspects of community life, from personal experiences with safety and infrastructure to views on environmental and social issues.
- The collective responses help the Steering Committee identify priorities for the CID and form the blueprint of the business plan and budget that aims to enhance the community's overall well-being.
- This document presents the results of the UMS.

Reach

- The survey was launched on 17 August 2024
- It was distributed to as many residents in the defined area for which the Steering Committee had email address (581 recipients)
- It was shared on multiple local WhatsApp and Facebook groups reaching residents outside the defined area & many in the area for whom email addresses had not been available prior
- It was shared by TBK Watch to their extensive distribution list

Key data

- 219 responses have been received to date (mid Sept 2024)
- Of which 168 are from verified property owners within the defined area; exceeding the requirement of 20% of owners (equivalent to 146 responses)
- 20 responses received from property owners within the broader Tamboerskloof area
- 24 responses received from tenants in the Tamboerskloof area

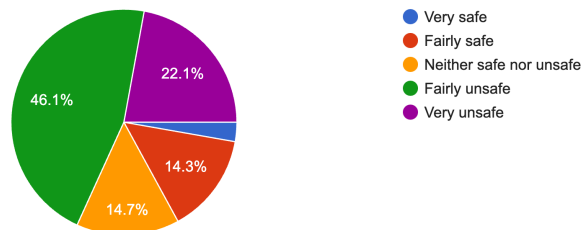

Key highlights

- The results of the UMS were largely consistent and indicated a general willingness to improve the Tamboerskloof area and support for a CID structure to achieve this aim.
- Respondents were predominantly property owners (90%) and for 84% their Tamboerskloof home is their primary residence
- More than 50% of respondents have lived in Tamboerskloof for over a decade
- More than 81% of respondents expressed their support in principle for a CID
- A further approx. 16% indicated they might be in support once they had more information

Public Safety

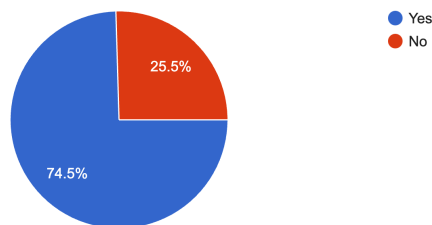

Do you/would you feel safe walking the streets of TBK at night?

217 responses

Have you or anyone else in your household ever been a victim of crime in TBK?

216 responses

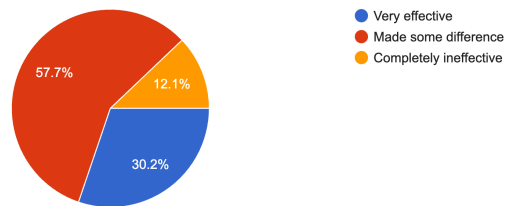

- The majority of respondents feel safe in their homes during the day and at night and when walking the streets during the daytime. When it comes to walking the streets at night, more than 70% feel unsafe to some degree.
- Areas of most concern are using the steps within Tamboerskloof (50% feel unsafe) and on the mountainside where 70% feel unsafe yet more than two-thirds of respondents still walk, run or hike there.
- Regrettably 75% of respondents have been the victim of crime in the area with burglary (63%) and theft out of a motor vehicle (58%) most commonly cited.

Public Safety

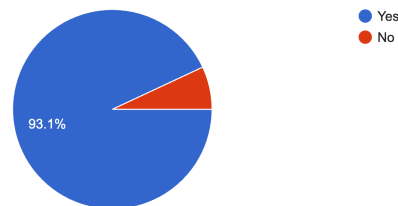

If any of these measures are in place, how effective do you believe they have been in reducing crime?

182 responses

Do you believe public safety in TBK would be improved by more patrols/patrollers?

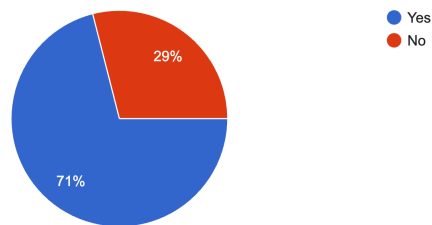

216 responses

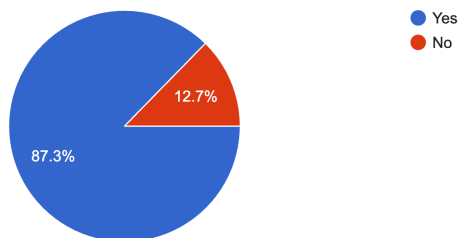

- 78% of respondents reported that security measures such as cameras, lights and guards are already installed on their street and 86% believe they have made at least some difference to crime.
- In 75% of cases, the measures are being funded by only a handful of residents.
- Sadly, just under 50% of respondents feel less safe now than when they first moved to Tamboerskloof and 94% believe public safety would be improved by more patrols.

Cleanliness

Do you believe additional/more frequent cleaning of the streets would be beneficial?
214 responses

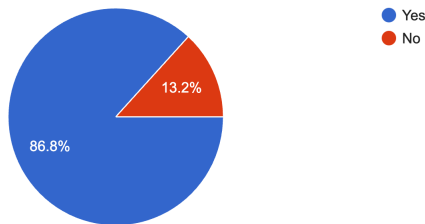

Do you believe vagrants are a problem in TBK?
213 responses

- Almost 80% believe CCT keeps Tamboerskloof reasonably clean but 73% would like more street cleaning
- Almost 88% of residents believe vagrants are a problem and a contributory factor to petty crime (90%) and litter (87%) in the area

Environmental Development

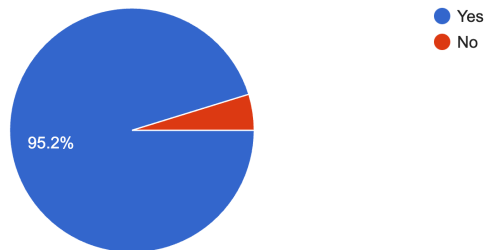

Do you believe TBK would benefit from planting of additional indigenous plants and trees?
212 responses

- Respondents are almost evenly divided on whether CCT keeps public verges suitably clean & tidy
- Almost 60% of respondents are happy CCT adequately maintains the infrastructure & equipment in the parks
- 87% believe the planting of more indigenous plants and trees would be beneficial.
- While only 44% are concerned about the risk of fire, 75% believe invasives should be cleared from the mountainside and 54% from public spaces.

Social Development

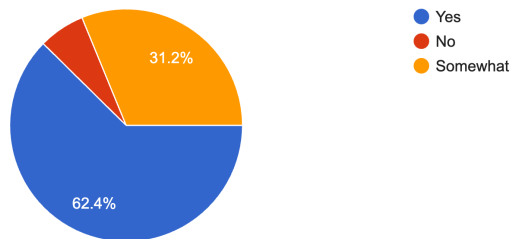

Are you in favour of supporting relevant, qualified NGOs working to help people off the streets?
210 responses

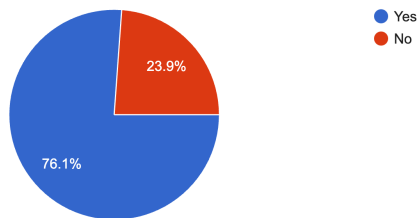

- An overwhelming 95% of respondents are in favour of supporting relevant, qualified NGOs working to help people off the streets
- Just over 66% of respondents support the concept of Tamboerskloof residents taking appropriate steps to provide support to those less fortunate in and around the area

CID awareness

Are you familiar with the concept of a Community/City Improvement District (CID)?
218 responses

Are you aware that once a CID is established, all property owners are liable to pay the additional rate with the exception of those who have rebate arrangements in place?
218 responses

- Community awareness of the CID structure is high with almost 93% of respondents familiar with the concept to a certain degree
- 70% of respondents are aware a CID is operated as a non-profit company with close oversight from CCT
- Similar proportions of respondents indicated they understood that an application to establish a CID can only be made once more than 60% of property owners in the defined area vote in favour; and that, once established, all property owners are liable for the additional rate
